

E-commerce Engineering PHP (entry-level)

APPLY FOR THIS JOB

VILNIUS/KAUNAS/ŠIAULIAI / DELIVERY DEPARTMENT – DELIVERY /
FULL-TIME

Take an opportunity to start your career in software development – guided by an experienced mentor you will deep dive into PHP with Spryker (one of the world's hottest large-scale e-commerce systems) and will get certified in just 2 months, here at NFQ.

While taking over an entry-level E-commerce Engineering challenge for 2 months, you will grow your competencies while being fully focused on your learning and development and preparation to join one of your desired engineering teams after your onboarding period is over.

The track starts in May – learn more below and join us soon!

During your first months, you will

- Apply your IT knowledge in practice while developing solutions for international clients in teams
- Learn the core principles of software development with Spryker Commerce OS (PHP)
- Learn to work with complex system architecture
- Have an opportunity to develop your e-commerce software development knowledge and start preparing for the -official Spryker certification exams. Industry-recognized Spryker certification will help you validate your expertise, elevate your career in e-commerce solutions development, and transform businesses with Spryker technology
- Enjoy your work and the learning from your senior teammates and dedicated mentors
- Feel our inner vibe and culture better
- Be able to understand the business case, task and its goal
- Be responsible for the task you are assigned to
- Kick-start your career

What you will bring

- Preferably a Degree in Computer Science, Software Engineering or related discipline (might be still a student)
- Some experience in programming web-based software using PHP and OOP
- Fundamentals of at least one of modern PHP frameworks (Symfony or Laravel)
- Goal-oriented attitude
- Critical thinking, strong analytical skills and great attention to detail
- Good Lithuanian and English language skills both written and spoken

What we offer

- An opportunity to deepen your knowledge and learn from experienced professionals
- A working culture that is high performing, ambitious, collaborative and fun
- Opportunity to solve interesting challenges
- Flexible working hours
- Salary: EUR 1000 gross
- Office perks, team activities and company-wide entertainment – we have excellent knowledge about how to have fun
