

QUALITY POLICY

Quality policy is our approach and commitment to ensuring the high quality of our activities by implementing the quality assurance provisions for studies in the European Higher Education Area.

We aim to help students become independent individuals who:

- are not restricted by any norms and prejudices (original);
- understand the processes and models of certain activities;
- are able to analyse and solve problems logically;
- develop new ideas (creative);
- are able to turn radical ideas into reality (pragmatic);
- have confidence and self-belief;
- are able to communicate professionally and work with people of different attitudes, characters and cultures;
- develop organizational and planning skills, information susceptibility and personal initiative;
- are able to take decisions responsibly and implement them in different situations.

The main principles of the College's activities are:

- **For the student** – personal attention, understanding and dialogue, high-level information and technological support for studies;
- **For an employee** – recognition of personal significance, conditions for developing competence and initiative and raising qualifications, tolerance of personal values and compatibility with the objectives of the institution;
- **For the employer** – a qualified, proactive, self-determined and ethical professional.

The College upholds values that create a unique internal atmosphere and culture of communication:

Sustainability – a focus on long-term perspective, stability, reliability and creation of a lasting value for all stakeholders.

Respect for everyone – a value that starts with productive and creative communication and cooperation. We believe that only by respecting each other we will create an environment that promotes creativity, initiative and sustainability.

Openness to new ideas and challenges – we are flexible, driven, curious and original, always looking for new opportunities to express ourselves.

Community – we appreciate everyone's personal contribution, maintain an active dialogue with each other and encourage responsible teamwork.

APPROVED

By Resolution No AT-02 of the Academic Board
of VVK of 23 March 2022

Transparency – equality of individuals, impartiality of decisions, objectivity of assessment, clarity of relationships, rights and obligations.

In accordance with the principles of quality assurance and the European Higher Education Area Quality Assurance Framework, the College:

- expresses itself;
- meets the needs of the parties concerned;
- ensures that the measures chosen to achieve the College's objectives are actually implemented and effective.

The quality management system is constantly monitored, improved, and its effectiveness ensured.

„Opportunities Leading to Success!“
