

APPLICATIONS OF INFORMATION TECHNOLOGY AND COMPUTER ARCHITECTURE

5 ECTS (CREDITS)

Purpose of the subject:

To enhance competences in computer architecture and application of information and communication technologies in professional activities.

Study subject annotation:

The subject provides the basic knowledge to help the student navigate their new academic environment. The lectures introduce the structure of the College and the organisation of studies, provide specific support for the student who wants to acquire the general skills of independent learning, time planning and research work, and develop information communication (ICT) competence. Students are also introduced to the architecture of modern computers and develop the ability to select the correct hardware and software in order to effectively use technical and software tools in their professional activities.

Evaluation form:

Exam
