PROFESSIONAL ENGLISH

6 ECTS (CREDITS)

Purpose of the subject:

To further improve students' English language skills to C1 level according to the Common European Framework of Reference for Languages, to deepen the understanding of specific IT terms and to include them in the students' active English vocabulary. To translate terms from/into English, to use them correctly, to read and understand specialised non-adapted articles.

Study subject annotation:

The course is based on teaching aids for IT professionals (Infotech, Information Technology, English for ICT studies, etc.), reading and analysing specific texts: translating from/into English, explaining terms, summaries, case studies, expressing opinions, etc. This involves the four communicative competences: listening, speaking, reading, writing. In addition to specialised English, general English skills are improved and knowledge gaps are bridged. Comparisons of terms are also made.
