

PROJECT: SOFTWARE DEVELOPMENT

3 ECTS (CREDITS)

Purpose of the subject:

To develop the ability to create a working software product or a working prototype of a working software product on a topic freely chosen by the student/student group and approved by the project supervisor

Study subject annotation:

As part of the project, students are required to demonstrate fundamental skills in initiating, planning, and implementing software development projects. This includes formulating project goals, objectives, scheduling, and progress tracking. Additionally, students must exhibit proficiency in designing, building, and testing modern applications. In the realm of software development, they are expected to showcase their knowledge and skills in programming and user interface design.

Evaluation form:

Exam
